California Trolley and Railroad Corporation
Attn: Rod Diridon, Executive Director

RE: Train Museum Proposal

The Vendome neighborhood supports the Train Museum idea in concept, with the following requirements: These are the same requirements verbally discussed during the presentations.

1) Traffic calming: California Trolley and Railroad Corporation will make an effort to get a stop sign at the intersection of Ryland and Santa Teresa Streets.

2) Project scope: The total project includes the train museum and the parkland, as presented to the neighborhood. Energies applied to complete both components will ensure the public may enjoy both the museum and the park.

3) Santa Teresa Street beautification: The east side of Santa Teresa Street will be enhanced to ensure an attractive and welcoming entrance. It currently does not have any visually appealing elements and the neighbors feel strongly that an impressive entrance to the museum creates a positive first impression.

Thank you for the two Train Museum presentations you and your team gave to the Vendome Neighborhood. Please keep us updated on the project!

Sincerely,

Tina Morrill
Vendome Neighborhood President
